

# WESTBRIDGE ONCOLOGY IMAGING

## CT / MRI Tumor Assessment Report

|                   |                                                                                |
|-------------------|--------------------------------------------------------------------------------|
| Patient ID        | SUBJ005                                                                        |
| Study ID          | KLIN-ONC-DEMO-001                                                              |
| Visit             | Week 40                                                                        |
| Accession         | ONC-005-WEEK_40                                                                |
| Exam date         | 17-Oct-2026                                                                    |
| Report date       | 18-Oct-2026                                                                    |
| Exam              | CT chest/abdomen/pelvis with contrast                                          |
| Indication        | Metastatic pancreatic adenocarcinoma; protocol tumor assessment per RECIST 1.1 |
| Ordering provider | Investigator, Oncology Site                                                    |

### Technique

CT imaging of the chest, abdomen, and pelvis was performed following standard oncology protocol acquisition. Multiplanar reformats were reviewed. Measurements are reported in millimeters.

### Comparison

Compared with prior protocol tumor assessment and baseline lesion map.

### Findings - Target Lesions

| Lesion ID | Anatomic description          | Size | Unit | Status  |
|-----------|-------------------------------|------|------|---------|
| T01       | Right middle lobe lung lesion | 24   | mm   | PRESENT |
| T02       | Left liver segment III lesion | 31   | mm   | PRESENT |

Target lesion sum for this assessment: 55 mm.

### Findings - Non-target and New Lesions

| Lesion ID | Description            | Status  | Progression/new lesion comment |
|-----------|------------------------|---------|--------------------------------|
| NT01      | Right pleural effusion | PRESENT | No                             |

### Impression

Protocol follow-up assessment for SUBJ005 at Week 40.

Target lesion sum is 55 mm.

No new measurable lesion is described in this radiology report.

Non-target disease: NT01 present.

### Investigator RECIST Worksheet Entry

| Field             | Entered value |
|-------------------|---------------|
| Response criteria | RECIST 1.1    |

| Field                      | Entered value  |
|----------------------------|----------------|
| Target lesion response     | SD             |
| Non-target lesion response | NON-CR/NON-PD  |
| New lesion response        | NO NEW LESIONS |
| Overall response           | SD             |
| Accepted by investigator   | Yes            |

**Extraction target for demo**

Expected extraction: subject\_id, visit, assessment\_date, method, lesion\_id, lesion\_category, lesion\_description, measurement\_value, measurement\_unit, lesion\_status, non\_target\_status, new\_lesion\_present, RECIST response fields. Maps primarily to TU, TR, and RS.
