

# WESTBRIDGE ONCOLOGY IMAGING

## CT / MRI Tumor Assessment Report

|                   |                                                                                |
|-------------------|--------------------------------------------------------------------------------|
| Patient ID        | SUBJ005                                                                        |
| Study ID          | KLIN-ONC-DEMO-001                                                              |
| Visit             | Baseline                                                                       |
| Accession         | ONC-005-BASELINE                                                               |
| Exam date         | 10-Jan-2026                                                                    |
| Report date       | 11-Jan-2026                                                                    |
| Exam              | CT chest/abdomen/pelvis with contrast                                          |
| Indication        | Metastatic pancreatic adenocarcinoma; protocol tumor assessment per RECIST 1.1 |
| Ordering provider | Investigator, Oncology Site                                                    |

### Technique

CT imaging of the chest, abdomen, and pelvis was performed following standard oncology protocol acquisition. Multiplanar reformats were reviewed. Measurements are reported in millimeters.

### Comparison

No prior study under this protocol. Baseline target and non-target lesions are identified below.

### Findings - Target Lesions

| Lesion ID | Anatomic description                  | Size | Unit | Status  |
|-----------|---------------------------------------|------|------|---------|
| T01       | Right middle lobe lung lesion         | 33   | mm   | PRESENT |
| T02       | Left liver segment III lesion         | 40   | mm   | PRESENT |
| T01       | Duplicate Target 1 liver lesion entry | 29   | mm   | PRESENT |

Target lesion sum for this assessment: 102 mm.

### Findings - Non-target and New Lesions

| Lesion ID | Description            | Status  | Progression/new lesion comment |
|-----------|------------------------|---------|--------------------------------|
| NT01      | Right pleural effusion | PRESENT |                                |

### Impression

Baseline measurable disease is present.

Target lesion sum is 102 mm.

Non-target disease: NT01 present.

### Extraction target for demo

Expected extraction: subject\_id, visit, assessment\_date, method, lesion\_id, lesion\_category, lesion\_description, measurement\_value, measurement\_unit, lesion\_status, non\_target\_status, new\_lesion\_present, RECIST response fields. Maps primarily to TU, TR, and RS.
