

ONCOLOGY INVESTIGATOR CLINIC NOTE

Screening and Baseline Eligibility Note

Patient ID	SUBJ005
Study ID	KLIN-ONC-DEMO-001
Site ID	103
Note date	03-Jan-2026
Visit	Screening
Provider	Sub-investigator, Medical Oncology

Subjective / History

SUBJ005 is a 59-year-old male with Metastatic pancreatic adenocarcinoma enrolled for screening. Subject provided informed consent on 27-Dec-2025. Prior systemic therapy lines: 1.

Objective

ECOG performance status is 2. Screening date: 03-Jan-2026. Planned treatment start date: 11-Jan-2026. Race: ASIAN. Ethnicity: NOT HISPANIC OR LATINO. Country: USA.

Assessment

Stage IV metastatic disease. Histology confirmed: Yes. Measurable disease at baseline: Yes. Subject appears eligible for protocol tumor assessment workflow pending final central review.

Plan

Proceed with baseline imaging, central safety laboratories, and study treatment per protocol schedule. Record baseline demographics and eligibility data in EDC.

Extraction target for demo

Expected extraction: subject_id, age, age unit, sex, race, ethnicity, country, consent date, screening date, treatment start date, diagnosis, stage, ECOG, prior therapy lines, histology confirmed, measurable disease flag. Maps primarily to DM and eligibility checks.
